

# THE SOUND GARDXN

## Modal Argon8 - Viridian

Preset and Sequence installation in the Modal App.

1. Open the app and click on Preset Manager, patch, and then bank 4.
2. Select presets 420-449 by selecting preset 420 and then shift click preset 449 to highlight all 30 preset slots.
3. Right click and choose import.
4. Navigate to the un-zipped file you downloaded and choose presets 420-449 in the patches folder.
5. Select yes to install.
6. Repeat the same process for the sequence folder for installing into their respective banks/slots.

Important Notes:

1. All presets have been volume matched so you shouldn't have dramatic volume fluctuations between sounds.
2. Bpm unfortunately can not be saved per preset, this soundset was intended to be used within a range of 72-83 bpm.

If you have any questions, please contact us, enjoy!
